

LOOKING FORWARD TO THE

Join us at the 7th MR in RT Symposium!

We invite you to learn how MRIdian® System technology gives physicians tools for tumor targeting precision:

- SEE - Real-time, high-definition soft-tissue visualization
- SHAPE - Adapt to daily anatomical shape and positioning changes during treatment
- STRIKE - Automatic beam gating for targeted dose delivery when the tumor is within a defined boundary

Don't miss Dr. Yang's presentation highlighting MRIdian functional imaging, refinements in radiation dosage and MRI research on **June 24th at 8:00am** in the SoCo ballroom of Delta Hotels Toronto.

"Potentials of on-board MRI: the UCLA experience"

Yingli Yang, PhD

Assistant Professor of Radiation Oncology

UCLA Health, Jonsson Comprehensive Cancer Center

ViewRay is at Table #1 during the conference. We hope to see you there!
